2.	Key Risk Metrics	4
3.	Capital Management	6
4.	Liquidity and Funding Risk	8

1. Introduction

This report provides an overview of the regulatory capital and risk management practices and exposures of APS Bank and its subsidiaries (hereafter 'the Group') in line with Pillar 3 of the Basel framework. Pillar 3 of the Basel framework aims to promote financial market discipline through regulatory disclosure requirements. These requirements enable market participants to access key information relating to a bank's regulatory capital and risk exposures, in order to increase transparency and confidence about a bank's exposure to risk and the overall adequacy of its regulatory capital.

The Pillar 3 disclosures within this report are prepared in line with Banking Rule BR/07/2014 - *Publication of Annual Report and Audited Financial Statements of Credit Institutions Authorised Under the Banking Act 1994*, and governed by Part Eight of the Capital Requirements Regulation (CRR) II No. 2019/876. Pillar 3 disclosures on Environmental, Social and Governance (ESG) factors are published in a separate report which is available on the Bank's website in conjunction with this report. To enhance the comparability and consistency of banks' Pillar 3 disclosures, the EBA published Implementing Technical Standards (ITS) on institutions' public disclosures of the information referred to in Titles II and III of Part Eight of Regulation (EU) No 575/2013.

The Group has in place a Pillar 3 Disclosures Policy which sets out the approach to be adopted to ensure that the Group complies with the disclosure requirements set out in the CRR and respective EBA ITS. The Policy outlines the roles and responsibilities, the basis of preparation of the report and the verification and approval process.

This report is not subject to external audit. However, this report has undergone comprehensive internal review as outlined in the Pillar 3 Disclosures Policy. This report has been reviewed by the Risk Committee and Audit Committee and has been approved by the Group's Board of Directors (hereafter referred to as 'the Board'). A reference has been added in cases where additional information addressing Pillar 3 requirements is included in the Financial Statements. The Board is satisfied that the internal controls implemented around the preparation of these Additional Regulatory Disclosures are adequate and such disclosures present a fair and accurate picture of the Group's risk profile and capital position.

2. Key Risk Metrics

The Risk Department performs regular risk assessments and stress testing exercises, the results of which are presented to the Board of Directors, Risk Committee and other committees as may be required, including the Assets-Liabilities Committee and the Executive Committee. The Risk Appetite Dashboard, which complements the Risk Appetite Statement, is presented to the Board of Directors on a quarterly basis. These reports provide insight on the Group's risk profile and benchmarks this with the Group's risk appetite and internal limits. Risk reports are presented using a RAG (also known as "traffic lights") approach. Early warning signals and excesses are escalated to the Chief Risk Officer, followed by the Risk Committee and the Board of Directors, as deemed applicable, to ensure that the necessary corrective actions are implemented.

The following table summarises the Bank's key regulatory ratios, and their underlying components, for the reporting quarter and the preceding four quarters. These ratios form an integral part of the Bank's strategic planning and risk management framework.

EU KM1 - Key Metrics

3. Capital Management

The Group continuously aims at building and sustaining a strong capital base and at applying it efficiently throughout its activities to reach its strategic objectives, optimise shareholder value whilst ensuring the sustainability of the Bank's business model and risk profile. A strong and prudent capital base is one of the pillars of the Group's business model and maintaining adequate capital ratios will continue being key to enable the Group to steer through currently challenging economic conditions.

Capital planning is a crucial pillar of the Group's business planning process. The Group examines both the current and future capital requirements in line with its Risk Appetite and strategic business objectives, in order to establish its near and long-term capital needs, capital expenditures required for the foreseeable future, target capital levels and potential sources of capital. Capital planning is the responsibility of the Assets-Liabilities Committee.

As an integral part of the Group's business planning process, the Enterprise Risk Management Unit performs a detailed analysis of the capital requirements over the medium- and long-term, which are part of the Internal Capital Adequacy Assessment Process (ICAAP). This involves compiling scenario analysis and stress testing exercises to evaluate the impact of the Bank's strategic growth on its risk profile, whilst also taking into consideration regulatory requirements. The impact of business objectives on the Group's risk profile is also evaluated as part of the annual budgeting process.

3.1. Capital Instruments

The Bank's capital is composed of Common Equity Tier 1 (CET 1) and Tier 2 capital instruments, as defined by the CRR. CET 1 capital is the highest quality capital and, therefore, the most effective in absorbing losses. The Bank's capital is mainly composed of CET 1 capital, which primarily consists of ordinary share capital and retained earnings. In June 2022 the Bank issued its first public offering worth €65,800,000, hence strengthening further its capital position. Further information on the share capital composition is provided in Note 37 to the 2022 Financial Statements.

In November 2020, the Bank joined the list of issuers on the Malta Stock Exchange with the listing of the €55,000,000 3.25% APS Bank plc Unsecured Subordinated Bonds 2025-2030. The subordinated bond qualifies as Tier 2 Capital, which ranks after the claims of all depositors (including financial institutions) and all other creditors.

Further information on the main features and terms and conditions of the Bank's capital instruments is provided in Note 48.6 appended to the 2022 Financial Statements which are available on the Bank's website.

3.2. Capital Requirements

In accordance with the CRR, the Bank calculates its capital requirements for Pillar 1 risks using the following approaches:

- The Standardised Approach for the purposes of calculating its risk-weighted exposure to credit risk. The
 minimum regulatory capital allocation to credit risk is calculated at 8% of the credit risk-weighted exposures.
- The Standardised Approach for the purposes of calculating its risk-weighted exposure to foreign exchange risk.
 The capital allocation for foreign exchange risk is therefore equal to 4% of the higher of the sum of the Group's net short or net long positions.
- The Basic Indicator Approach for the purposes of calculating its risk-weighted exposure to operational risk. Under this approach, a 15% capital charge is applied on the average operating income for the previous three financial years.

The following table discloses the Group's risk weighted assets and capital requirements as at 31 March 2023 for each exposure class in line with the CRR, and the respective Pillar 1 capital requirement based on the methods outlined above. The difference between the capital requirement of the Group and the Bank is immaterial.

The Bank is required to meet a total SREP capital requirement (TSCR) of 12.0%, consisting of 8.0% minimum Pillar 1 requirement and a 4.0% Pillar 2 requirement (P2R)¹. In line with the Capital Requirement Directive (CRD V), banks may partially use capital instruments that do not qualify as Common Equity Tier 1 (CET1) capital, for example Additional Tier 1 or Tier 2 instruments, to meet the P2R.

Banking Rule BR/15/2022 – Capital Buffers of Credit Institutions Authorised Under Banking Act 1994 requires institutions to maintain capital buffers over and above the Pillar 1 requirements. In accordance with this Rule, the Bank maintains a Capital Conservation Buffer (CCB), a Countercyclical Capital Buffer (CCyB) and an Other-Systemically Important Institutions (O-SII) buffer. The capital buffers (collectively referred to as the Combined Buffer Requirement) are to be met from Common Equity Tier 1 capital and, if the minimum buffer requirements are breached, the Group might be subject to capital distribution constraints.

As at 31 March 2023, the Bank's Tier 1 and Total Capital Ratios stood at 15.13% and 18.70%, respectively, thereby above the respective applicable regulatory minima.

7

 $^{^{\}mathrm{1}}$ Further information on the capital requirements is included in Section 2, table EU KM1

4. Liquidity and Funding Risk

Liquidity risk is the risk that the Group cannot meet its financial obligations as they fall due in the short term and medium term, either at all or without incurring unacceptable losses.

Funding risk is the risk that the Group cannot meet its financial obligations as they fall due in the medium to long term, either at all or without increasing funding costs unacceptably. Funding risk can also be seen as the risk that the Group's assets are not stably funded in the medium and long term.

The Bank manages this risk by seeking to match the maturities of assets and liabilities in its balance-sheet. The management of liquidity and funding is governed by a detailed Liquidity and Funding Risk Policy. This Policy establishes clear lines of responsibility, limits and guidance on the measurement and monitoring of the Group's net funding requirements. The Asset Liability Management Unit is responsible for implementing the Policy; whereas the Assets-Liabilities Committee is responsible for monitoring and ensuring the implementation of and adherence with the Policy, as well as ensuring consistency with the Bank's Risk Appetite. It also ensures that adequate liquidity is held to meet both expected and unexpected commitments. This Policy includes a detailed Liquidity Contingency Plan, which addresses the strategy for handling liquidity crises and includes procedures for covering cash flow shortfalls in emergency situations.

Through the Internal Liquidity Adequacy Assessment Process (ILAAP), the Bank ensures that it maintains, at all times, liquidity resources, which are adequate, both as to amount and quality, to ensure that there is no significant risk that its liabilities cannot be met as they fall due. Thus, the ILAAP serves as a key decision-making tool in liquidity and funding management. The latest ILAAP, compiled in line with EBA Guidelines, concluded that the Bank maintains adequate levels of liquidity buffers and adequate funding. The document is reviewed in detail by the Bank's Internal Audit Department and Risk Committee and subsequently presented to the Board for approval. Following Board approval, the ILAAP Report is submitted to the MFSA.

The Bank funds loans primarily by sourcing retail deposits. As at 31 March 2023, the Bank's Loan-to-Deposit ratio, computed in line with the methodology adopted by the EBA, was equal to 98.8%, which is in line with the Bank's risk appetite. Moreover, the Bank has a high level of stable deposits, which acts as a virtually permanent source of liquidity. The Bank also has a portfolio of highly marketable assets that can be easily liquidated in the event of any unforeseen cash flow requirements.

4.1. Liquidity Coverage Ratio

The Liquidity Coverage Ratio (LCR) measures the Group's liquidity buffer to its net liquidity outflows over a 30 calendar day stressed period. The Bank reports this ratio to the MFSA on a monthly basis. During Q1 2023, the Bank's LCR fluctuated consistently above the applicable minimum requirement of 100% and in line with its risk appetite. As at 31 March 2023, the LCR stood at 135.2% (31 December 2022: 128.5%).

The below table discloses quantitative information on the Bank's LCR for each of the four calendar quarters, starting June 2022 and ending March 2023. The figures are calculated as the simple averages of month-end observations over the twelve months preceding the end of each quarter. Given that the Bank does not have another 'material currency'², other than the Euro, the Bank reports the LCR in the reporting currency (Euro).

² Banks are required to assess the LCR by material currencies. A currency is considered to be a 'material currency' if the aggregate liabilities denominated in that currency amount to, or exceed, 5% of a bank's total liabilities.

4.2. Net Stable Funding Ratio

The Net Stable Funding Ratio (NSFR) measures the amount of stable funding available to a financial institution against the required amount of stable funding. Under CRR II, institutions are required to maintain a NSFR of at least 100%. Given that the Bank does not have a 'material currency'³, other than the Euro, the Bank reports the NSFR in the reporting currency (Euro), regardless of the actual denomination of assets, liabilities and off-balance sheet items. All liabilities with a residual maturity of one year or more shall be subject to a 100% ASF factor, unless otherwise specified in CRR II.

At 132.48%, the Bank's NSFR was above the regulatory minimum requirement and within the Bank's risk appetite as at 31 March 2023.

EU LIQ2 - Net Stable Funding Ratio

		Ur	Weighted			
		No Maturity	< 6 months	6 months to <1 year	> 1 year	Velgited Value
		€000	€000	€000	€000	€000
Availa	ble stable funding (ASF) Items					
1	Capital items and instruments	-	-	-	313,942	313,942
2	Own funds	<u> </u>	-	-	313,942	313,942
3	Other capital instruments		-	-	-	-
4	Retail deposits		1,557,278	348,123	283,415	2,061,784
5	Stable deposits		1,062,268	207,876	201,597	1,408,233
6	Less stable deposits		495,010	140,249	81,818	653,551
7	Wholesale funding		546,147	128,388	24,242	268,321
8	Operational deposits		-	-	-	-
9	Other wholesale funding		546,147	128,388	24,242	268,321
10	Interdependent liabilities		-	-	-	-
11	Other liabilities	-	23,405	2,535	23,132	24,399
12	NSFR derivative liabilities					
13	All other liabilities and capital instruments not included in the above categories		23,405	2,535	23,132	24,399
14	Total Available stable funding (ASF)					2,668,447
Requi	red stable funding (RSF) Items					
15	Total high-quality liquid assets (HQLA)					14,011

³ Banks are required to assess the NSFR by material currencies. A currency is considered to be a 'material currency' if the aggregate liabilities denominated in that currency amount to, or exceed, 5% of the bank's total liabilities.
